

# The elements can be relentless. Of course, so can we.

Created with equal parts resistance and resilience, the Bikamper tent features our state-of-the-art seam-sealed, waterproof ripstop nylon. Wind, rain, hail, or the blazing sun, we've got you covered.

## TENT TECHNOLOGIES & FEATURES

### INTEGRATED DESIGN

Utilizes your bicycle and front wheel (26", 27.5", 29" or 700c) instead of poles for stability and for further weight reduction.

### WATERPROOF RIPSTOP NYLON

A 3 season tent. The fly is 70D 190T Ripstop Nylon with 2500 mm PU coating for weather protection.

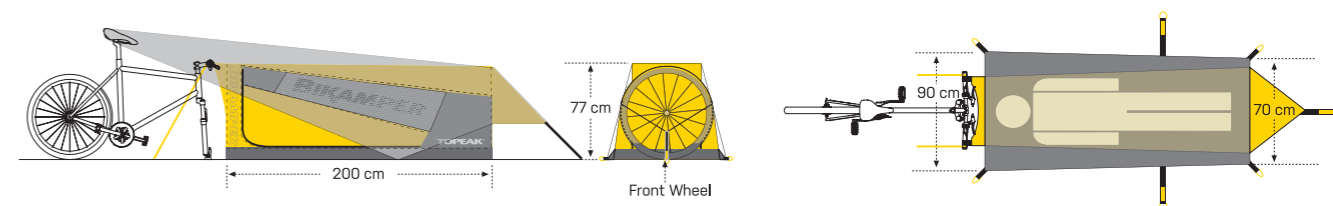

### ULTRA LIGHT & COMPACT

Packs down to a compact size and has its own stuff sack that straps to the handlebars.

Front fork anchors allows mounting on bike with QR skewers or 15mm thru-axles

updated Additional pockets for mountain bike handlebars to keep the fly can cover the tent properly

## BIKAMPER™

Bikamper is a personal shelter that utilizes a 26", 27.5", 29" mountain or 700c road front wheel in place of tent poles. The main body is constructed of water-resistant urethane coated 45D ripstop nylon and features three mesh panels for ventilation and stargazing on pleasant nights. The fly is constructed of waterproofed 70D ripstop nylon for additional protection should the weather take a turn for the worse. Both tent and fly pack down to a small, space saving size. Includes its own special stuff sack that straps to the handlebars. Not compatible with fat tire bikes.
